

MUHAMMAD IHTESHAM UL HAQ

Python / Django Backend Developer

ihshamm480@gmail.com | +92 331-7283175 | [linkedin.com/in/m-ihshamm480](https://www.linkedin.com/in/m-ihshamm480) | github.com/Ihtes-ham

PROFILE

Recent BS Software Engineering graduate (2022–2026) and Python/Django backend developer with hands-on experience building scalable, database-driven web applications — from a final year project integrating AI services and async task processing, to freelance client work and a one-year internship delivering production-style business systems. Comfortable across the full backend stack: DRF, PostgreSQL, Redis, and Celery, with practical experience integrating AI/LLM capabilities via the Gemini API. Fast learner and strong problem-solver who writes clean, maintainable code — open to full-time, remote, and freelance backend / full-stack roles.

EXPERIENCE

Backend Developer Intern — Enigmatix Pvt. Ltd., Bahawalpur

June 2024 – July 2025

- Built backend solutions using Python and Django across multiple internal and client projects.
- Implemented REST APIs, authentication systems, and database-driven CRUD operations.
- Shipped production-style modules including the HR Management System (see Key Projects), an Online Lab Diagnosis Portal with Django-ORM-driven booking and reporting, a Student Record Management dashboard, and a Blog Application with user-level access control.
- Gained practical exposure to real-world development workflows, code reviews, and team collaboration.

KEY PROJECTS

SocialSync — AI-Powered Social Media Management Platform

Final Year Project · 2025–26

Django REST Framework · PostgreSQL · Redis · Celery · Gemini API

- Designed a full-stack platform managing Twitter, Instagram, Facebook, and LinkedIn from one dashboard — 22+ database models and 60+ REST endpoints, documented via Swagger/ReDoc.
- Used PostgreSQL for storage and Redis + Celery/Celery Beat to run 7 scheduled background tasks: post publishing, analytics refresh, auto-replies, growth snapshots, and competitor tracking.
- Integrated the Google Gemini API for AI-generated captions/hashtags, with TextBlob sentiment scoring and Pandas-based best-time-to-post analysis.
- Implemented JWT authentication, Fernet-encrypted OAuth token storage, and role-based team access for multi-user organizations.

ScholarIntell — Intelligent Scholarship Recommendation & Guidance System

Freelance Project · 2025

Python · Django · HTML · CSS · JavaScript

- Built end-to-end as a contract developer: a web platform that matches students to foreign scholarships based on their academic profile and eligibility criteria.
- Designed and populated a large structured database of international scholarship listings, with an admin panel for managing entries and an eligibility-matching recommendation engine.
- Delivered step-by-step application guidance for each recommended scholarship, from requirement-gathering through deployment.

HRMS — Human Resource Management System

Django · Python

- Complete HRMS covering employee records, department structure, attendance, and a full leave-management workflow with role-based access.

github.com/Ihtes-ham/hrms

Social Media & Marketing Analytics Platform

Django

- Analytics platform delivering social media and marketing data visualization with engagement insights.

github.com/Ihtes-ham/social-analytics-platform

Face Recognition Attendance System

Django · OpenCV

- Touchless, face-recognition based attendance system with check-in/out, leave workflows, and an analytics dashboard.

github.com/Ihtes-ham/face_attendance_system

Bugzilla Lite

- Lightweight bug-tracking application for logging, categorizing, and resolving software issues.

github.com/Ihtes-ham/bugzilla_lite

EDUCATION

BS Software Engineering — The Islamia University of Bahawalpur

2022 – 2026 · CGPA: 3.50

TECHNICAL SKILLS

Languages: Python, SQL, JavaScript, HTML5, CSS3

Backend: Django, Django REST Framework, JWT, OAuth 2.0

Databases: PostgreSQL, MySQL, SQLite, Redis

Async / Queues: Celery, Celery Beat

AI / Data: Google Gemini API, TextBlob, Pandas

Frontend: Bootstrap, Tailwind CSS, Chart.js

Tools: Git, GitHub, VS Code, PyCharm, Postman, Swagger/ReDoc

CERTIFICATIONS & CONTINUOUS LEARNING

- Django Crash Course (Traversy Media, CodeWithHarry, Mosh) · Official Django Docs — hands-on across all projects · continuous learning via GitHub & Stack Overflow
